TECHNOPORT SOLUTIONS

Started on April 4<sup>th</sup> 2000 TECHNO PORT SOLUTIONS ably supported by the most competent management and technical skills.

Techno Port Solutions was born out of a need for an ethical marketing and IT company. As employee's in the Internet industry for over two years, and literally speaking to thousands of business owners across the country, Abhishek Bali, Manjinder Jaswal, Daman Preet Singh recognized a need business owners had when they wanted to take their business to the World Wide Web. Someone they could trust.

All three have an extensive background in marketing development and business strategy and met each other while working at one of the Dot-Com in the heyday of the Internet.

This is where the online bug bit them . They were hooked. Realizing a lot of business owners' confusion on what to do or not to do on the web, they set out to help business owners understand and utilize the full potential of this new marketing medium

Trust our experience to manage your business

With Warm Regards

## WHAT WE DON'T DO IS "GUESS"

Understanding our clients' business is our greatest strength. We listen first, and then some more, then we explain what we understand and listen some again. It's a philosophy that's guided our clients to enjoy remarkable successes. Their brands thirst for a unique competitive edge. And we find that only by understanding the client's business first. So we will never offer an opinion before we have understood their business, who the customer is and how they will respond.

We are not just another web design company, but a company run by real people with many, many years business experience and understand fully what being in business is all about and how to promote the products you are selling.
